

## HMRC splits advisory fuel rates for electric cars

HMRC has split fuel advisory rates for electric cars depending on where drivers charge their company cars due to the price discrepancy between home and public chargers.

**From 1 September 2025**, the single rate for fully electric cars will be abolished and replaced with two different rates reflecting whether a car is charged at home or on a public charger.

**The rate will be 8 pence per mile for home charging and 14 pence per mile for public charging. This will replace the current universal rate of 7 pence per mile.**

These rates will be reviewed quarterly in line with petrol and diesel advisory fuel rates.
